

HANDSOFF[®] Telephone

The HANDSOFF phone helps passengers feel safe.

Reliable emergency communication

This device complies with the requirements of the Americans with Disabilities Act (ADA) and enhances the safety and security of all passengers. The HANDSOFF phone also meets national elevator-safety code requirements for two-way communication.

Installation is fast and easy because the HANDSOFF phone fits into your existing cab phone cabinet.

For maintenance customers, the HANDSOFF phone is automatically connected to OTISLINE[®], Otis' 24-hour customer care center. If an alternate emergency number is preferred, it can be programmed at no additional cost.

About OTISLINE

- Voice recognition routing system to identify true entrapments for phones programmed to main ADA 800 number.
- Dispatchers will stay on the phone if requested by passengers.
- Ability to connect passengers to a third party.
- Fluent in English, Spanish and French.
